PREFACE

SINCE 1896 The Monument Pottery Company has grown steadily in size and capacity with only the lull due to the World War. This interval was used for re-routing of production and studied improvement in methods.

This enables us to offer our products to the trade and consumer with increasing confidence in the satisfaction that will be afforded the users of Monument All-Clay Porcelain Ware.

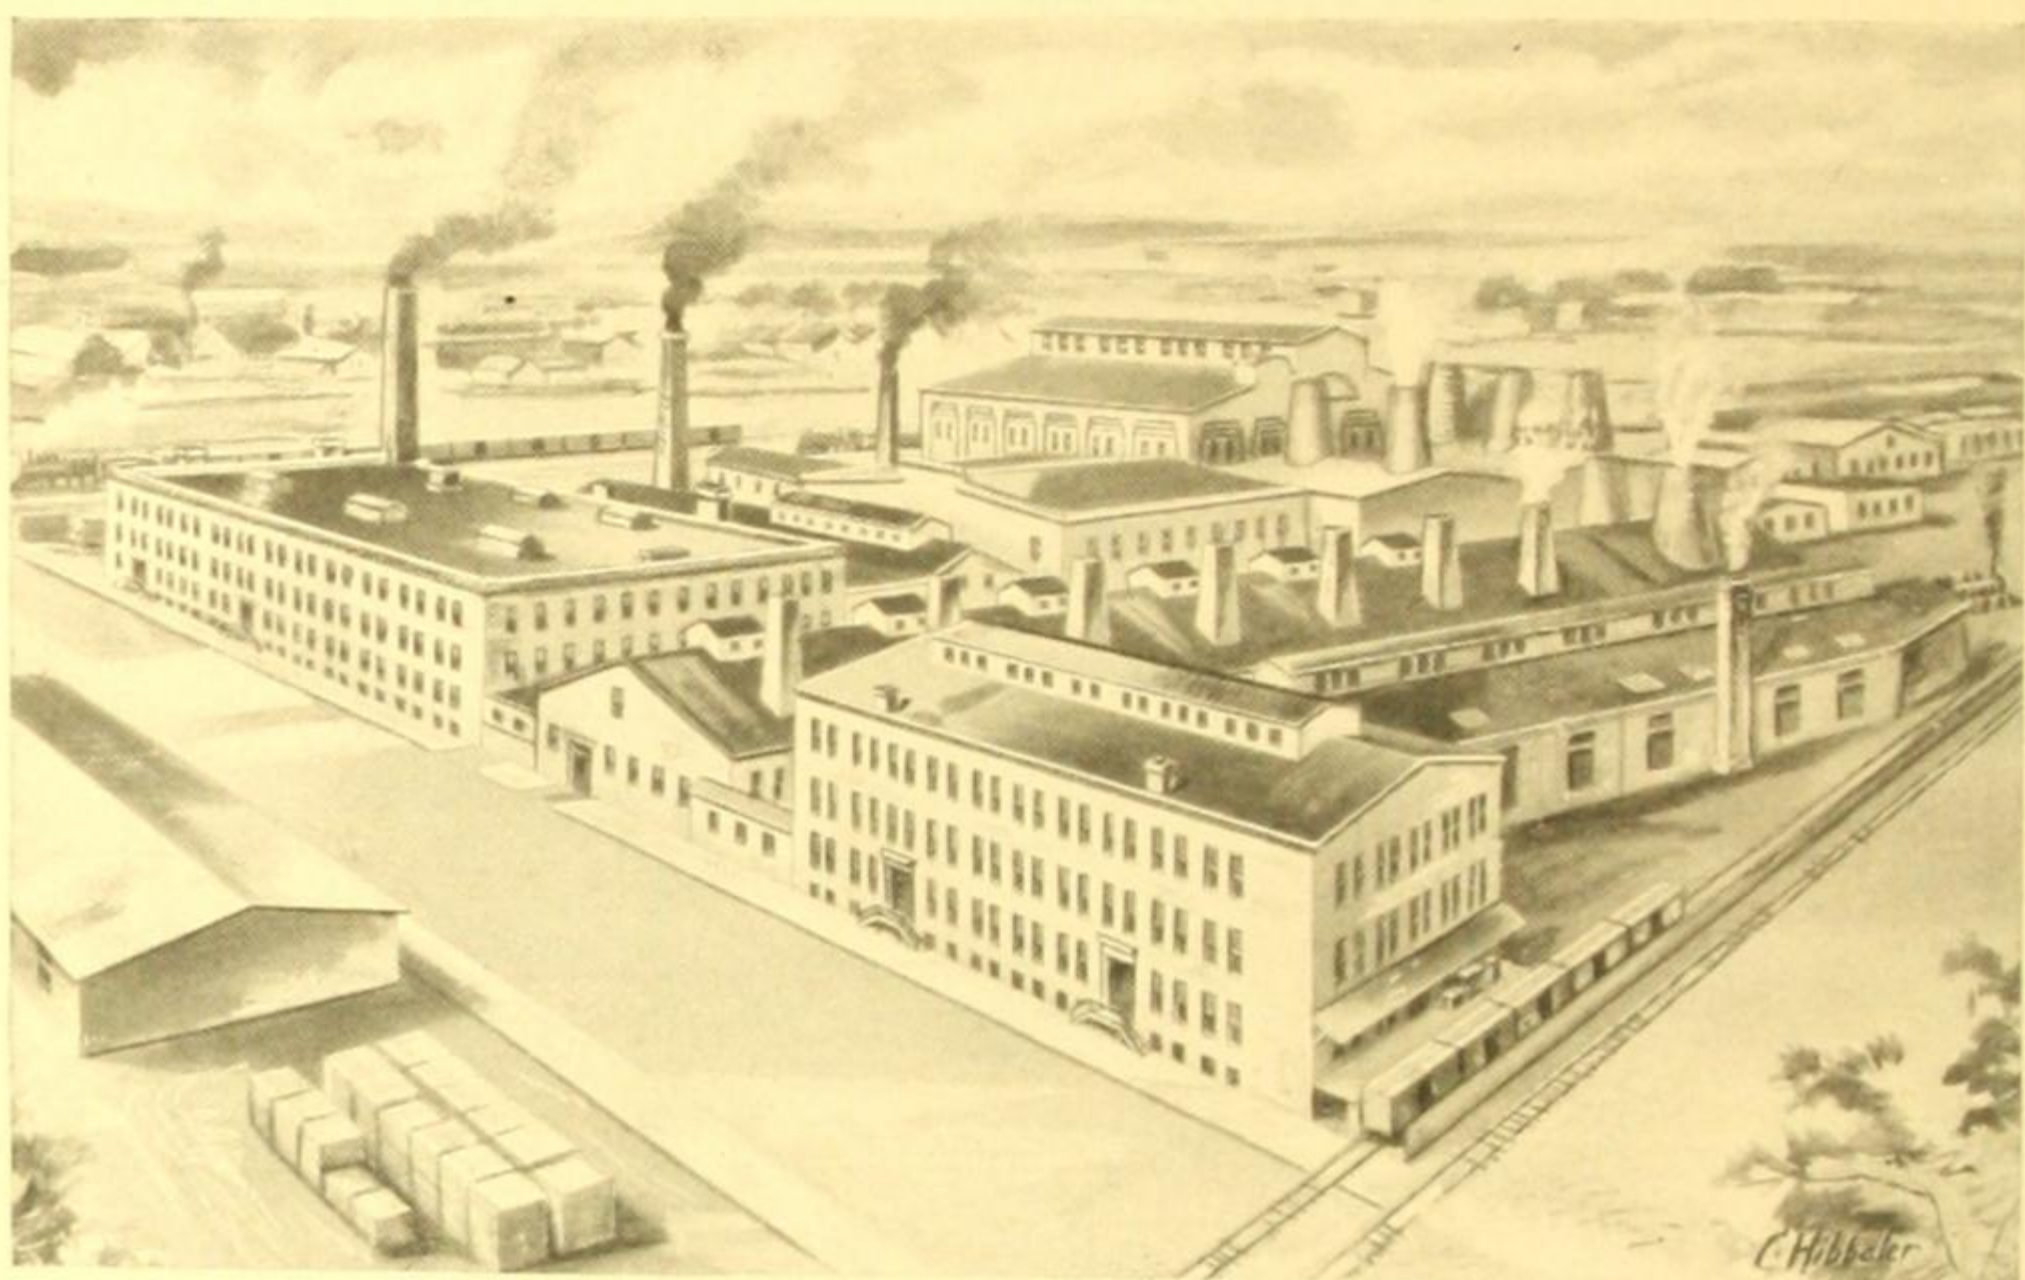

An organization trained and pledged to such service as the most particular may demand is ready to meet your requirements.

Monument All-Clay Plumbing Fixtures have always about them the evidence of great care in working out designs that please; permanence and durability of All-Clay products that history substantiates; and of maximum service.

Monument All-Clay Porcelain Ware is probably best known on account of its acknowledged superiority for durability and beautiful high glaze.

In order to further promote the sales and add to the efficiency in the manufacturing of solid Porcelain Ware, we have converted all of our plant and equipment into the requirements of that particular line. We have ELIMINATED ALL VITREOUS WARE heretofore shown in Catalogue "M" such as closets, lavatories, drinking fountains, etc.

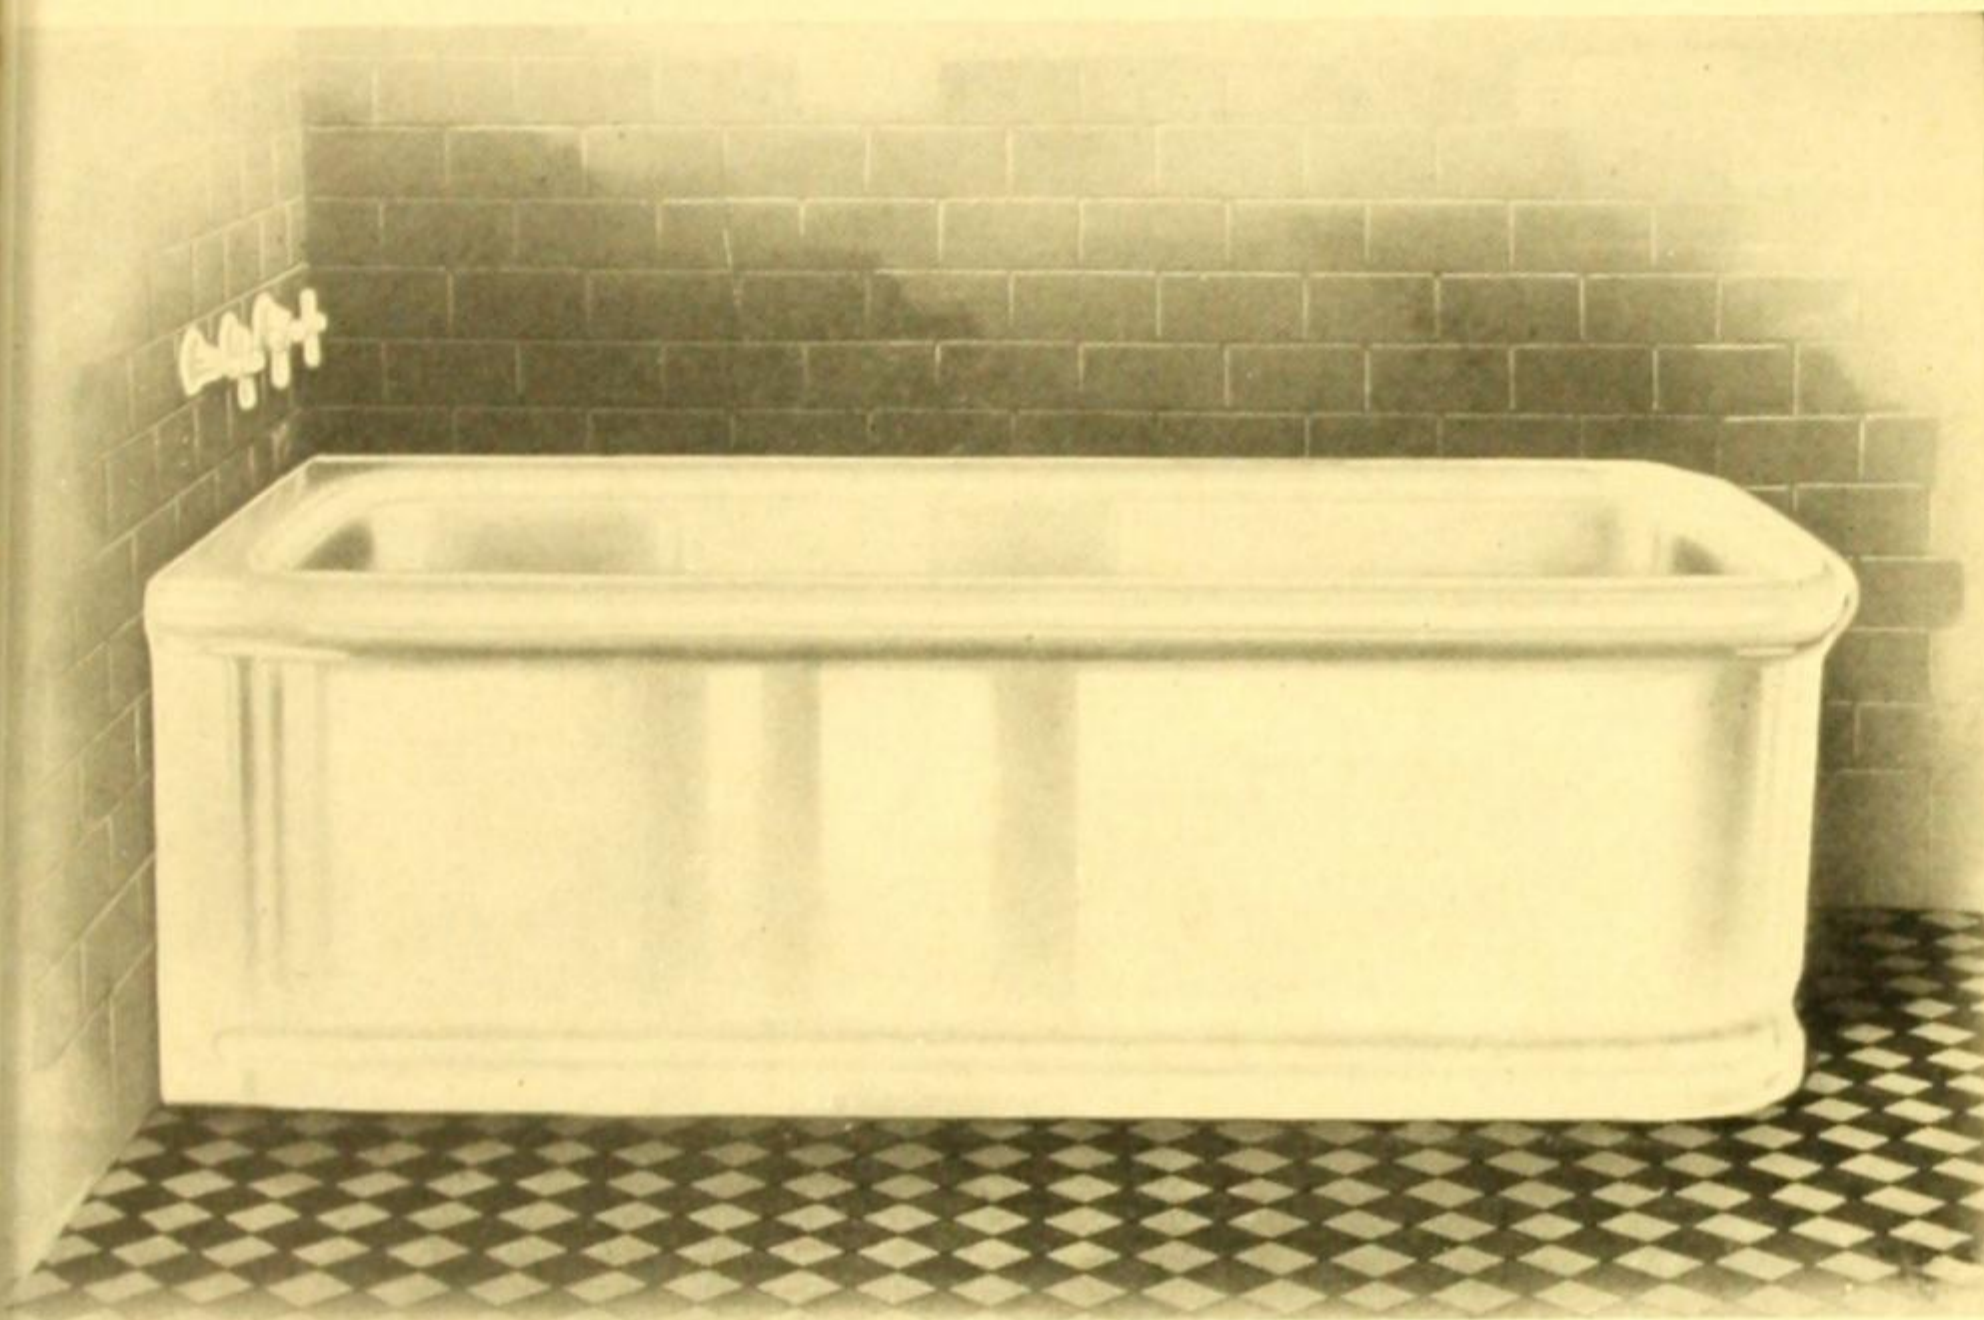

All of the illustrations in this catalogue are protected by copyright.

THE best method we know of to convince prospective customers of the infinite care and resultant quality of our product is to urge that everyone connected with the building and plumbing industries visit our factory.

We shall be glad to show any interested visitors about, and explain fully the processes by which All-Clay Porcelain products are made. The knowledge thus gained will give an assurance and pride in the industry that can be obtained in no other way.

We are proud of what we are doing here and are sure that the enthusiasm of every one of our employees is reflected in the quality so uniformly produced as Monument All-Clay Porcelain Ware.

GENERAL INFORMATION

Weight of water per cubic foot—62½ pounds.

Our glaze is acid proof.

Refer to the code words of the particular pieces when sending a telegram. It saves time and expense and is efficient.

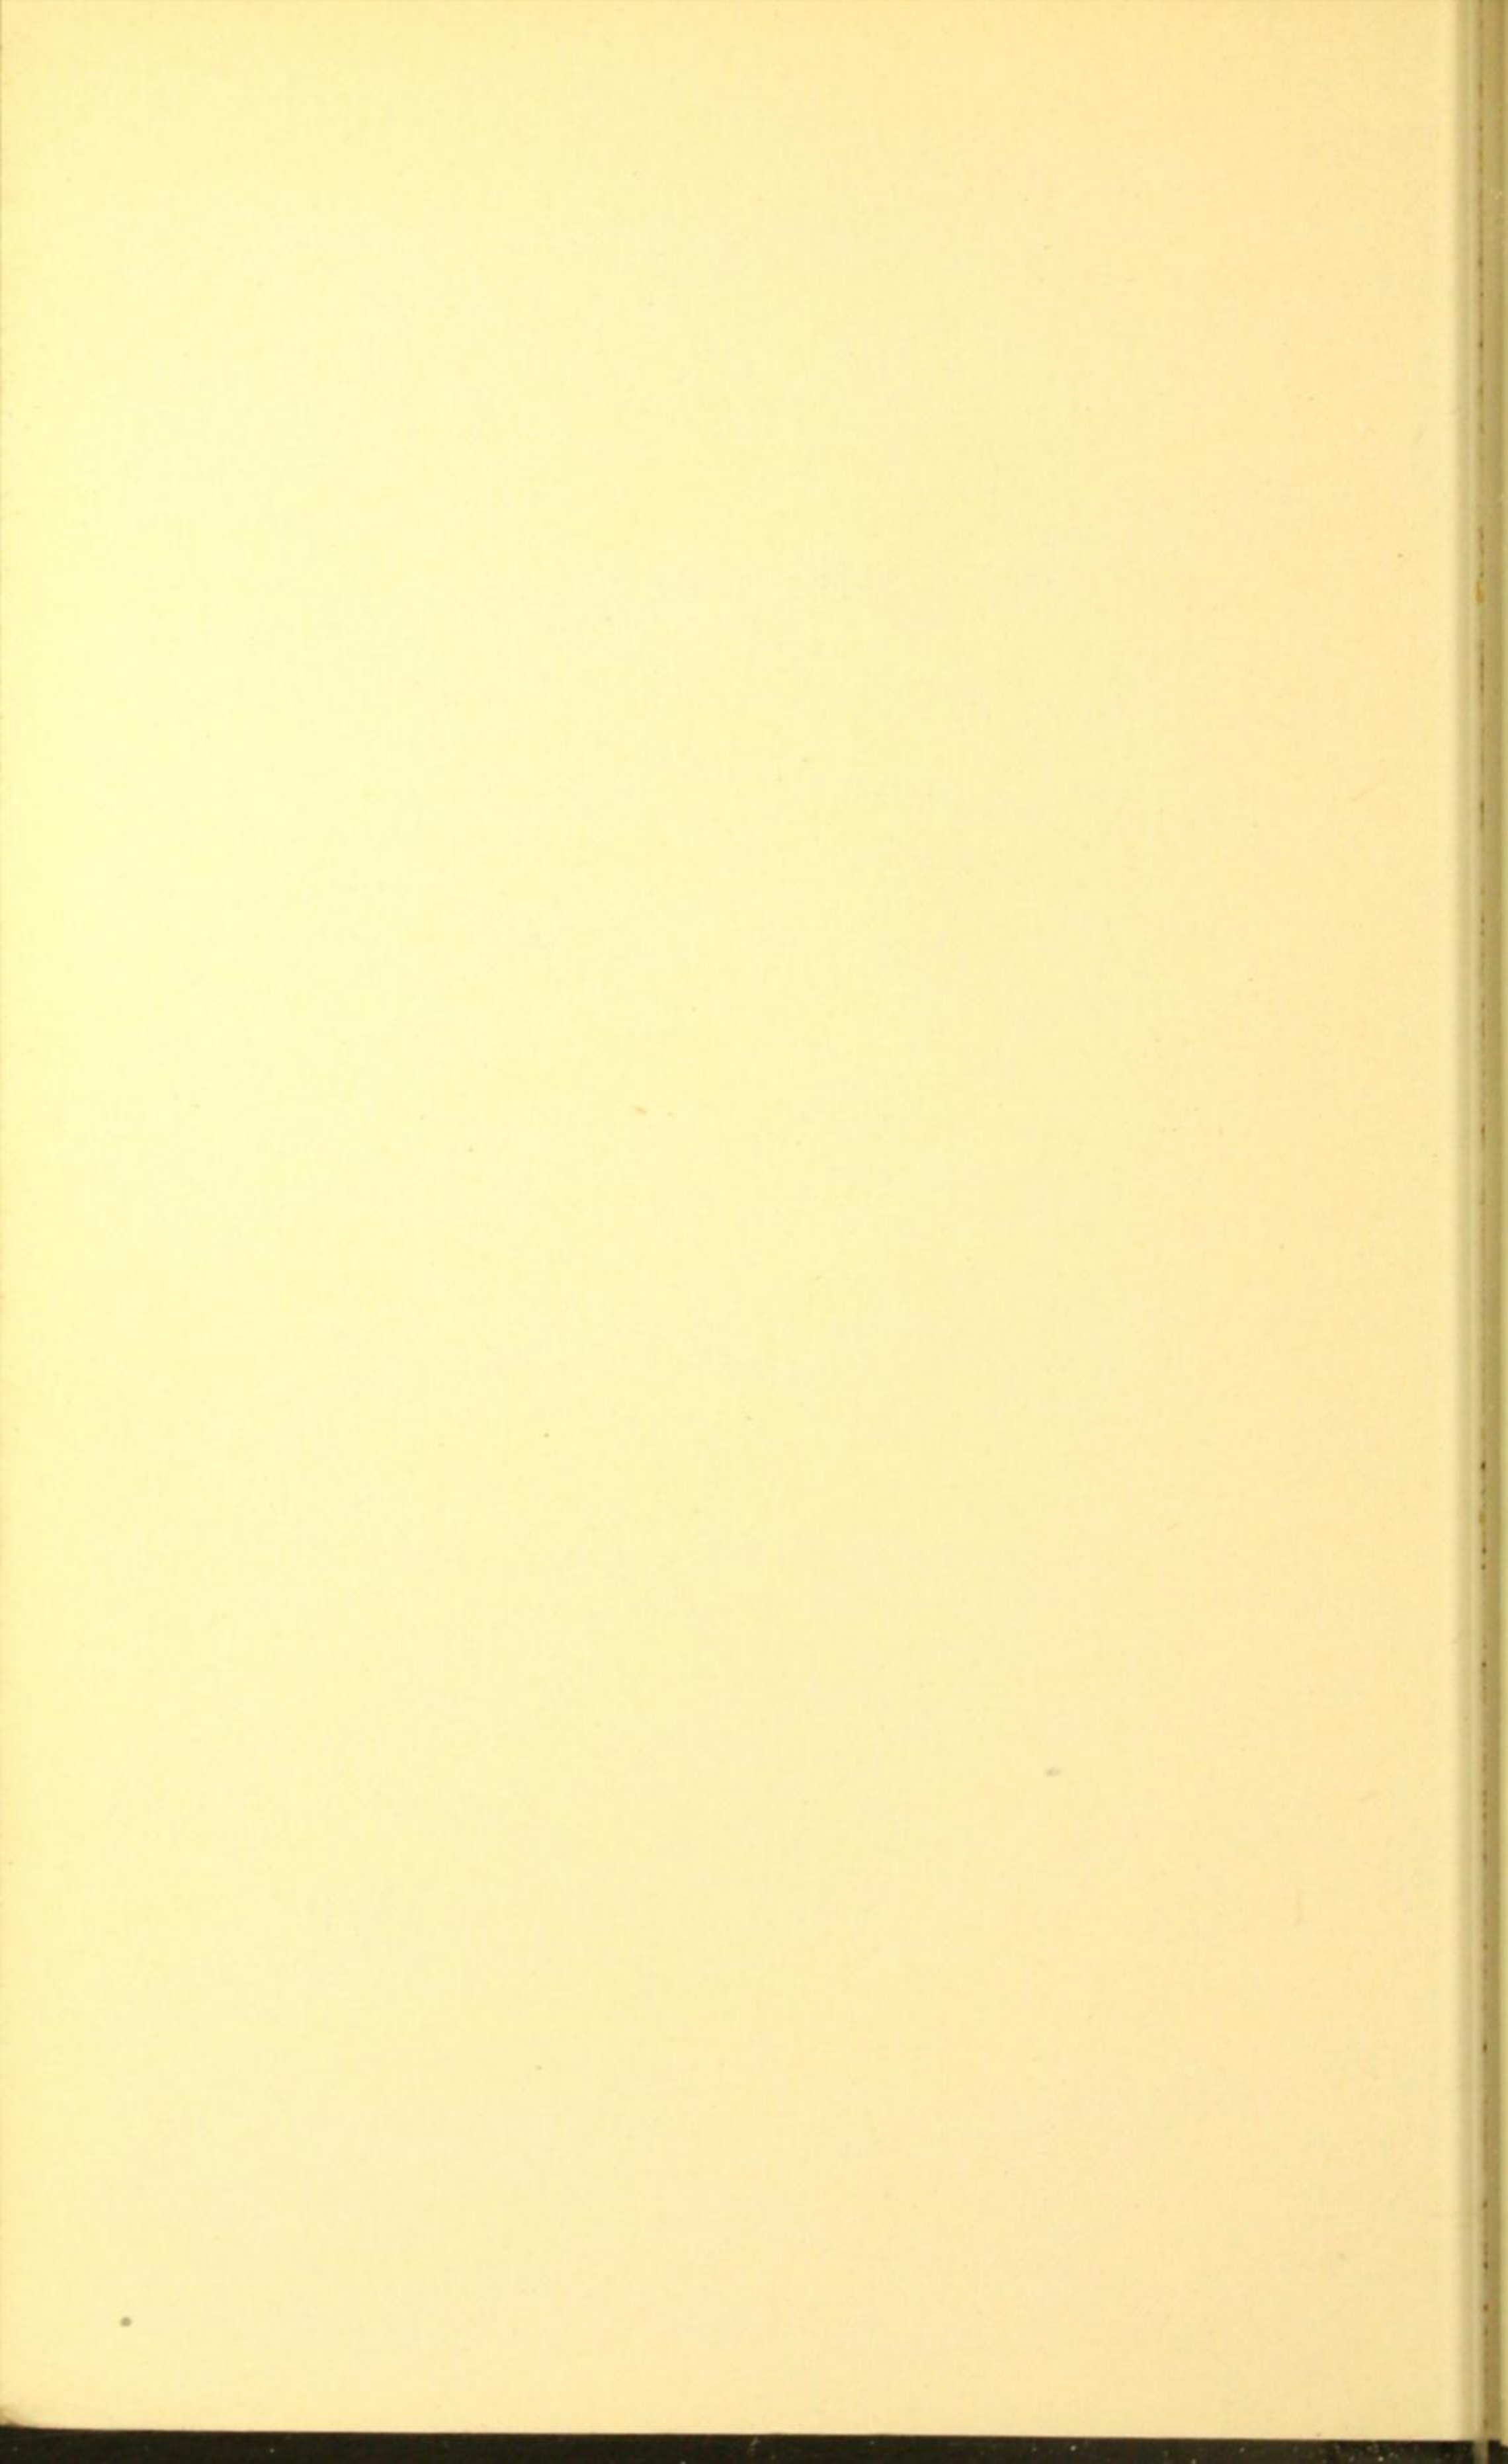

We believe the term "Class B" heretofore used has been a handicap to the trade, in that the owner or consumer did not properly understand its meaning. Monument Porcelain will hereafter be marketed as it has been and is now produced or manufactured—ONE GRADE OR QUALITY, and that the very best—to be known as Monument Porcelain.

For those who prefer the satisfaction of having an extra fine selected piece, we will be glad to extend this courtesy and service. The cost of pieces of Extra Fine Selection will fluctuate and may be had on application.

Hospital fixtures or large pieces not shown in our catalogue, where necessity demands, can be made up to order. We invite inquiries and will be glad to cooperate with authorities in charge who may have peculiar problems to work out. We have personal representatives within a few hours' ride of any point in the United States, and a Service Department with an experienced plumber to work out your problems.

Buff or Columbia colored Porcelain can be furnished when necessary. Prices on application.
